Work experience

Raisin GmbH ~ 5+ years

Aug 2016 - present

Raisin's goal is to provide savers the best interest rates, as the leading marketplace for investments throughout Europe.

- Freelance Senior Software Engineer *Jan 2022 to present*
- Freelance Software Engineer *2½ years*
- Freelance Frontend Developer *2 years*
- Junior Frontend Developer *1 year*

Main achievements:

2021/2022 - Developed a new line of investment products, using cutting-edge tech and tools (server-side rendering with NextJS and MaterialUI components library)

2018/2019/2020 - Increased test coverage, from 10% to over 70%.

Migrated integration tests from Selenium to Cypress.

Worked remotely non-stop from different countries around the globe, with up to 9 hours of time difference.

2018/2019 - Migrated legacy Java/JSP monolith frontend to React

2017/2018 - Developed the company's first modern frontend application with React, consuming a restful API. Created and developed a shared component library used across the whole company by other teams.

2016/2017 - Made the web app completely responsive for mobile users.

Freelancing ~ 2 years

Jan 2018 - December 2019

Developed wordpress websites for clients.

Sulake ~ 6 years

Sulake is a social entertainment company focused on providing a safe and fun online service for self-expression.

I joined Sulake as an intern and made my way through different departments and relocated to different cities (Milan, Madrid and Berlin). My last role there was **Global Community Engagement Coordinator**.

Skills

I have **6+ years of experience** with deep knowledge of JavaScript/TypeScript, React, testing and anything **frontend**.

For the last year I've been studying and learning **blockchain development** with good results: I've been successfully using web3 to develop trading bots and scripts. At the moment I'm piecing together **Solidity** and **web3** in some full-stack side projects.

In my free time I also like to **automate things** and create **full-stack applications** and **scripts**.

Projects

Check my [portfolio](#) or [GitHub account](#) for recent projects.
